SUMMARY

Final-year B.Tech IT student with a strong foundation in Python programming, REST APIs, and SQL. Hands-on experience developing Python scripts, backend integrations, and data processing solutions using FastAPI and PostgreSQL. Highly eager to learn ERPNext and the Frappe Framework to build customizations, reports, and business operation solutions. A quick learner with strong debugging skills, ready to support implementation teams as a Junior Python Developer at Sanjana Technologies.

TECHNICAL SKILLS

- **Languages:** Python, Java, SQL, Basic HTML/CSS/JavaScript
- **Backend:** FastAPI, REST APIs
- **Databases:** PostgreSQL, SQLite, Redis
- **CS Fundamentals:** Object-Oriented Programming (OOP), Data Structures & Algorithms, Debugging
- **Tools & Infra:** Git, Linux Command Line, Docker, AWS S3

EXPERIENCE

Software Developer Intern | *VILS AIT Pvt Ltd* Apr 2026 – Jun 2026

- Developed Python scripts and backend modules using FastAPI to support seamless system integrations and client-server communication.
- Debugged system issues end-to-end, providing technical support and ensuring stable backend performance.
- Collaborated with teams to understand functional requirements, translating them into working REST APIs and database solutions.

PROJECTS

Asynchronous-Resume-Scoring-API | *Python, FastAPI, PostgreSQL, Docker* Live | GitHub | 2026

- Built a Python-based backend solution to process and validate document data, creating small integrations via REST APIs.
- Designed relational database schemas in PostgreSQL, writing efficient SQL queries to manage and report on high-volume data inserts.
- Implemented strict error handling and debugging practices to ensure reliable data exchange and smooth application performance.

Event-Driven Notification System | *Python, FastAPI, RabbitMQ, PostgreSQL* GitHub | 2026

- Developed Python scripts and microservices to integrate software systems using message brokers, ensuring efficient data exchange.
- Implemented background data processing tasks independently, applying strong problem-solving logic to ensure absolute data integrity and zero data loss.

In-Memory LRU Cache | *Java, Data Structures, Algorithms* GitHub | 2025

- Applied strong Object-Oriented Concepts (OOP) and programming fundamentals to build a highly efficient cache with strictly O(1) time complexity.

EDUCATION

B.Tech Information Technology | *Sreenidhi Institute of Science and Technology* **CGPA: 8.34** | 2026

ACHIEVEMENTS

- 150+ Data Structures & Algorithms problems solved on LeetCode.
